

# Quality is One of Our Advantages!

Sentry's exclusive algorithms enable any standard Laserjet or Inkjet printer to produce fingerprints without pixels. This allows forensic examiners to see details and minutiae not rendered by any of our competitors!

FingerTIPSTM Image

You can see:

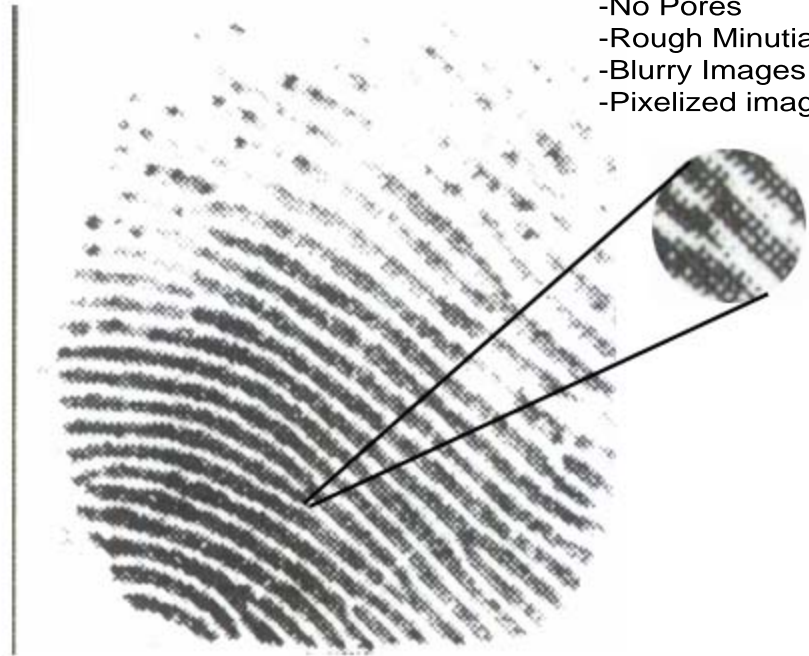

- Pores
- Smooth Minutia
- Sharper Images
- No Pixelization

A competitors image

You can see:

- No Pores
- Rough Minutia
- Blurry Images
- Pixelized images

Both fingerprints were taken with the CrossMatch Verifier 300 fingerprint scanner and printed with a laserjet printer.

Both fingerprint images were scanned at 600 dpi.
